Letters to the Editor

Discovery of a galactic supersoft binary X-ray source
Beuermann K., Reinsch K., Barwig H., Burwitz V., de Martino D., Mantel K.-H., Pakull M.W., Robinson E.L., Schwope A.D., Thomas H.-C., Trümper J., van Teeseling A., Zhang E. L1

Optical variability of the supersoft source RX J0019.8+2156
Greiner J., Wenzel W. L5

UBVRI photometry of SN 1994D in NGC 4526
Wu H., Yan H.-J., Zou Z.-L. L9

Frequencies and splittings of low-degree solar *p* modes: results of the Luminosity Oscillations Imager
Appourchaux T., Toutain T., Telljohann U., Jiménez A., Rabello-Soares M.C., Andersen B.N., Jones A.R. L13

Atomic carbon in a dark cloud: TMC-1
Schilke P., Keene J., Le Bourlot J., Pineau des Forêts G., Roueff E. L17

A cosmological test with compact radio sources
Kayser R. L21

Interaction of the Loop I supershell with the Local Hot Bubble
Egger R.J., Aschenbach B. L25

G 359.23–0.92, the Mouse, a pulsar powered bow shock?
Predehl P., Kulkarni S.R. L29

ROSAT observation of GX 1+4
Predehl P., Friedrich S., Staubert R. L33

First spectroscopic confirmation of a microlensing event towards the galactic bulge
Benetti S., Pasquini L., West R.M. L37

High energy electrons and positrons in cosmic rays as an indicator of the existence of a nearby cosmic tevatron
Aharonian F.A., Atoyan A.M., Völk H.J. L41

Ultraviolet extensions measured with ROSAT HRI around active galaxies
Arp H. L45

Heating of a rotating star
Harpaz A., Rappaport S. L49

Dust as the cause of spots on Jupiter
Field G.B., Tozzi G.P., Stanga R.M. L53

Cosmology

The equation of motion in Kaluza–Klein cosmology and its implications for astrophysics
Wesson P.S., Ponce de Leon J. 1

Nonlinear structures of self-gravitating systems in stable modes
Zhang T.X., Li X.Q. 339

Testing higher-order Lagrangian perturbation theory against numerical simulations. II. Hierarchical models
Melott A.L., Buchert T., Weiß A.G. 345

Bias minimisation in Potent
Newsam A., Simmons J.F.L., Hendry M.A. 627

Evidence for Sakharov oscillations of initial perturbations in the anisotropy of the cosmic microwave background
Jørgensen H.E., Kotok E., Naselsky P., Novikov I. 639

Extragalactic astronomy

NGC 1808: X-ray emission from the nuclear starburst
Junkes N., Zinnecker H., Hensler G., Dahlem M., Pietsch W. 8

Dense gas in nearby galaxies. VIII. The detection of OCS
Mauersberger R., Henkel C., Chin Y.-N. 23

Gamma-rays from the funnels of thick accretion disks around active galactic nuclei
Bednarek W., Kirk J.G. 366

The ultraviolet absorption spectrum of the $z = 2.72$ QSO HS 1700+6416. I. Results on heavy-element absorption systems
Vogel S., Reimers D. 377

Steps towards nonlinear cluster inversion through gravitational distortions. I. Basic considerations and circular clusters
Schneider P., Seitz C. 411

Metallicities in the Magellanic Clouds from CCD Strömgren photometry. The globular clusters NGC 1866 (LMC) and NGC 330 (SMC)
Hilker M., Richtler T., Gieren W. 648

Isophote shapes of merger remnants
Lima Neto G.B., Combes F. 657

A multilevel study of ammonia in star-forming regions. VI. The envelope of Sagittarius B2
Hüttemeister S., Wilson T.L., Mauersberger R., Lemme C., Dahmen G., Henkel C. 667

Redshift observations of Abell/ACO galaxy clusters in two candidate superclusters
Batuski D.J., Maurogordato S., Balkowski C., Olowin R.P. 677

Galactic structure and dynamics

Order in the distribution of 3-D periodic orbits
Barbanis B., Contopoulos G. 33

Chemical evolution in an inhomogeneous interstellar medium
Wilmes M., Köppen J. 47

The spatial distribution of the LMC foreground stars
Oestreicher M.O., Schmidt-Kaler T. 57

Dispersal and mixing of oxygen in the interstellar medium of gas-rich galaxies
Roy J.-R., Kunth D. 432

On the fate of self-gravitating galactic accretion disks
Köhler R. 690

Two integral dynamical models for disks with almost circular orbits
Batsleer P., Dejonghe H. 693

Stellar clusters and associations

Hot HB stars in globular clusters: physical parameters and consequences for theory. I. M 15 and its blue faint horizontal branch with gap
Moehler S., Heber U., de Boer K.S. 65

Blue stragglers in Galactic globular clusters: playing with specific quantities
Ferraro F.R., Fusi Pecci F., Bellazzini M. 80

UBVRI photometry and polarimetry of the stars in S 252 (NGC 2175). II. Interpretation
Haikala L.K. 89

Formation, structure and evolution of stars

A comparison between the observed and theoretically predicted distribution of WR stars in the Galaxy and in the Magellanic Clouds
Vanbeveren D. 107

(RN) Massive star evolution with rotation in the Large Magellanic Cloud

Non-LTE line formation for iron group elements. II. Fe VI
Becker S.R., Butler K. 215

The chemically peculiar star HD 221006
Leone F., Catalano F.A., Manfrè M. 223

The binary system of the Be star KX Andromedae
Floquet M., Hubert A.M., Hubert H., Ballereau D., Chauville J. 227

Compositional differences among the A-type stars. II. Spectrum synthesis up to $v \sin i = 110$ km s^{-1}
Hill G.M. 536

Monte Carlo simulation of light scattering in the envelopes of young stars
Voshchinnikov N.V., Grinin V.P., Karjukin V.V. 547

The atmosphere of the peculiar binary system ET Andromedae
Kuschnig R., Ryabchikova T., Piskunov N., Weiss W.W., LeContel J.M. 757
Spectroscopy of RY Sagittarii during the 1993 minimum
Asplund M. 763
Observation and modelling of main sequence star chromospheres. III. Differential analysis of hydrogen lines versus activity level in M dwarfs
Houdebine E.R., Doyle J.G., Kościelecki M. 773

Diffuse matter in space (including H II regions and planetary nebulae)

Fluorescent excitation of [Ni II] lines in the spectra of gaseous nebulae
Lucy L.B. 555
Interstellar polarization at high galactic latitudes from distant stars. I. First results for $Z \leq 600$ pc
Berdyugin A., Snåre M.-O., Teerikorpi P. 568
Millimeter and submillimeter observations of the Orion Bar. I. Physical structure
Hogerheijde M.R., Jansen D.J., van Dishoeck E.F. 792
(RN) Millimeter-wave molecular emission and absorption profiles toward Cassiopeia A
Liszt H., Lucas R. 811
Hot shocked ammonia towards Sgr B2
Flower D.R., Pineau des Forêts G., Walmsley C.M. 815
The discovery of methanol masers at 107 GHz
Val'tts I.E., Dzura A.M., Kalenskii S.V., Slysh V.I., Booth R.S., Winnberg A. 825
(RN) Extreme-infrared (800 μm) polarimetry at the JCMT of the W 75N-IRS 1 cloud
Vallée J.P., Bastien P. 831
Physical properties of the OMC-2 and OMC-3 cores from CS and $C^{18}O$ observations
Castets A., Langer W.D. 835

The Sun

Acoustic wave propagation in the solar atmosphere. I. Linear response to adiabatic wave excitation
Sutmann G., Ulmschneider P. 232
Acoustic wave propagation in the solar atmosphere. II. Nonlinear response to adiabatic wave excitation
Sutmann G., Ulmschneider P. 241
Oscillations of the Sun's chromosphere. VII. K grains revisited
von Uexküll M., Kneer F. 252
Solar flare Hα impact polarization from high energy electrons?
Fletcher L., Brown J.C. 260
Resonant absorption of Alfvén waves in coronal loops in visco-resistive MHD
Erdélyi R., Goossens M. 575
LTE polarized radiative transfer through interlaced atmospheres
del Toro Iniesta J.C., Ruiz Cobo B., Bellot Rubio L.R., Collados M. 855
Models of stationary siphon flows in stratified, thermally conducting coronal loops. I. Regular solutions
Orlando S., Peres G., Serio S. 861

The solar system

On the fractal dimension of the families of the asteroids
Zaninetti L., Cellino A., Zappalà V. 270
Sidereal period, pole and shape of asteroid 1620 Geographos
Kwiatkowski T. 274
Modulation of the interstellar oxygen-to-hydrogen ratio by the heliospheric interface plasma
Fahr H.J., Osterbart R., Rucinski D. 587
MHD model calculations for the effect of interplanetary shocks on the plasma tail of a comet
Wegmann R. 601

Celestial mechanics and astrometry

Semi-analytical theory of the mean orbital motion
Métris G., Exertier P. 278
MACHO photometry and astrometry
Høg E., Novikov I.D., Polnarev A.G. 287
Analysis of modern observations of the Sun and inner planets
Kolesnik Y.B. 874
Time ephemeris
Fukushima T. 895

Physical and chemical processes

Ion viscosity-driven accretion in the absence of magnetic fields
Meirelles Filho C. 295
Amplification of neutron star magnetic fields by thermoelectric effects. IV. Averaged small-scale modes and selection rules for large-scale modes
Wiebicke H.-J., Geppert U. 303
Non-linear interaction of a gravitational wave with a distribution of particles
Kleidis K., Varvoglis H., Papadopoulos D., Esposito F.P. 313
On the propagation of light in relativistic Maxwellian plasmas
Schlickeiser R. 615

Instruments, data processing, and computational methods

New optical solutions for very large telescopes using a spherical primary
Wilson R.N., Delabre B. 322

Abstracts of articles which have been published in A&A Supplement Series 109, No. 2 909

A catalogue of variable stars in the lower instability strip
García J.R., Cebral J.R., Scoccimarro E.R., Wahnon P., Arena R., Bazterra V., Pellizza L., Risi A., Rodríguez M.L., Zimmermann M. 909
Opacity sampling model photospheres for M dwarfs. II. The grid
Brett J.M. 909
StarHeads (Announcement of a database)
Heck A. 909
Radio to X-ray energy distribution of BL Lacertae objects
Giommi P., Ansari S.G., Micol A. 909

Heterochromatic extinction. I. Dependence of interstellar extinction on stellar temperature, surface gravity, and metallicity
Grebel E.K., Roberts W.J. 910

Heterochromatic extinction. II. Dependence of atmospheric extinction on stellar temperature, surface gravity, and metallicity
Roberts W.J., Grebel E.K. 910

Long-term photometry of variables at ESO. III. The third data catalogue (1990–1992)
Manfroid J., Sterken C., Cunow B., de Groot M., Jorissen A., Kneer R., Krenzin R., Kruijswijk M., Naumann M., Niehues M., Schöneich W., Sevenster M., Vos N., Vogt N. 910

$H^{13}CN$, $H^{13}CO^+$, HCN and HCO^+ observations of dense gas in galactic molecular clouds
Pirogov L., Zinchenko I., Lapinov A., Myshenko V., Shul'ga V. 911

The UV properties of normal galaxies. II. The "non-IUE" data
Rifatto A., Longo G., Capaccioli M. 911

The sunspotless flare on April 12, 1991 and the evolution of the neighboring filaments
Li K.J., Zhong S.H., Ding Y.J., Bai J.M., Li Q.Y. 911

NOAA 6850: an inactive delta-configuration and its magnetic and velocity fields
Bumba V., Klvaňa M., Kálmán B. 911

Catalogue of blue stragglers in open clusters
Ahumada J., Lapasset E. 912

The spectral hole-burning device: a 3-dimensional photon detector
Keller C.U., Gschwind R., Renn A., Rosselet A., Wild U.P. 912

Model fitting and error analysis for differential interferometry. I. General formalism
Chelli A., Petrov R.G. 912

Model fitting and error analysis for differential interferometry. II. Application to rotating stars and binary systems
Chelli A., Petrov R.G. 913

Uncertainties in the determination of the Stokes parameters due to photon noise
Sánchez Almeida J. 913
